

Flock Fixator

General

Flock crosslinker binder

Advantages

- Flock Fixator is crosslinked the carboxyl functional polymers at room temperature.
- It provides high reactivity.
- It provides to improve the water, chemical and abrasion resistance and better adhesion of the flock adhesive

Applications

- Flock Fixator should be added directly to the formulation immediately before use.
- It is recommended to use % water based resins.
- Since it will hydrolyze slowly in water-based formulations, the crosslinker mixture should be used within 24 hours.

Usage

- After adding to water based paste, It is recommended to be consumed within 24 hours.
- Otherwise causes degradation that is entered into the paste

Storage & Shelf Life

- Keep containers dry and tightly closed. Store in a ventilated place between (+5)-(+30)°C /(+41)-(+86)°F of temperature.
- It should be consumed within 2 years after the production date.

Technical Details

Appearance

Transparent Liquid

Odor

Characteristic

Color

Yellowish

Viscosity

<100mPa.s

Density

0,99 g/cm³ (25°C)

Boiling Point

>100°C (212°F)

VOC (%)

30% methoxypropanol

Solid Content (%)

70

Packaging Information

Flock Fixator is packed in 1/5/10/20/30/60/120 kg plastic cans

Important

The technical application and information that have been given above, are designed only as using instructions. Should not be considered as a warranty for any other use. When any help or assistance is required, our technical department is ready for help.

In case of emergency, Safety Data Sheet of this product should be ready for help at the working area. The warnings are given on safety data sheet of this product is for use outside the manufacturer/ distributor to direct/indirect can not be held responsible for any loss or damage.
